SUMMARY

+3 years experienced in IT. An expert in developing front-end and back-end website architecture and designing user interactions on web pages. Dynamic Full Stack Software Developer with both Frontend and Backend programming languages skills, developing complex solutions, processing strong creative thinking skills, highly energetic and integrated with strong troubleshooting abilities. Proficient in developing and designing front-end web architecture, and application development, ensuring the responsiveness of applications and working alongside graphic designers for web design features, building efficient, scalable, and maintainable code and user-friendly UI/UX. Creating server and database for website functionality, ensuring cross-platform mobile optimization. Working with APIs and technical documentation. Focusing both on technical and consumer needs to bring up the final Product. Have the ability to create algorithms effectively and communicate appropriately with team members. Quick to grasp new technologies and concepts to develop innovative and creative solutions to problems. Always eager to learn various technologies, tools, and libraries. Especially interested in HTML-CSS-JS, ReactJs, Node JS, and Django.

PROFESSIONAL EXPERIENCE

Frontend/ Javascript Developer   11/2022 – present
Hype Data-Driven Marketing Agency
Developed interactive, responsive, and scalable front-end solutions using HTML5, CSS3, JavaScript ES6. Improved customer brands' websites through the implementation of Google Tag Manager (GTM), Google Analytics 4 (GA4), and third-party library integrations. Provided support for HTML and CSS projects with JavaScript DOM manipulation, event listeners, and enhanced tracking setups for better data insights.

Frontend Developer   07/2022 – 12/2022
Freelance
Designed and built a website with Next.js, TypeScript, Tailwind CSS, SASS, and ShadCN UI, creating modern and responsive user interfaces. Developed an e-commerce payment page using JavaScript, DOM manipulation, iterators, callbacks, string/array functions, and events. Implemented transaction functionality with JSON, local storage, and array methods, and applied state management using React States and Redux. Integrated third-party libraries and optimized performance for a seamless user experience.

EDUCATION

Associate Degree, Web Design and Coding   07/2018 – 07/2020
Anadolu University

Bachelor's Degree, Economics   07/2012
Selcuk University

Other: Git, GitHub, Docker, Agile, Jira, SDLC, OOP, Cloud Functions, AI & Prompt Engineering (ChatGPT, Claude), API Integration.

PROJECTS

Hidayetoglu Emlak 🔗   01/2025
Next Js, Node js, Mongoose, shadcn/ui, Tailwind css, TypeScript
- This project aims to provide a modern and user-friendly real estate portal for Hidayetoğulları Real Estate Company. The system includes features such as management of real estate listings, blog posts, user management.
- Published to https://www.hidayetogullari.com.tr/ 🔗

Blog App Project   08/2022
React, React Router, Axios, Material UI, Context API
- In this project, I developed a website using React that allows users to register and login to publish new blog posts, utilizing an API developed with Django. Additionally, I implemented methods such as pagination, filtering, slider, and carousel in the project.
- Published to GitHub and Blog App 🔗

E-commerce Product Page Project   07/2022
React, Typescript, Tailwind, Redux-Toolkit
- In this project I got categories and products from api and listed them on home page. When clicking on the products, the detail page is navgate with the data. The create post button goes to the page where we created and submitted our new post. You can also filter products by category.
- Published to GitHub and UPayments Ecommerce 🔗
